

# clinell®

## Chlorhexidine Range

Complete cleansing for body decolonisation, pre-admission, and intensive care bathing.

# 2% chlorhexidine bathing

## Body decolonisation from the no. 1 hospital brand.

An effective decolonisation regime can prevent patients from pathogen transmission.

### 2% chlorhexidine digluconate formula

Containing 2% chlorhexidine digluconate, the Clinell Chlorhexidine Range kills harmful bacteria found on the skin. Upon application, the active ingredient binds to the skin forming an invisible barrier that provides up to 6 hours of protection against bacteria.

Using the Clinell Chlorhexidine Range provides patients with an additional level of protection during their hospital stay.

### Convenient pack sizes

With the convenience of Clinell, a no. 1 hospital brand, Clinell Chlorhexidine Wash Cloths and Gloves are both available in an easy-to-use 8 pack.

Each pack contains 8 large cloths or gloves, designed to deliver a complete body cleanse - without the need for rinsing.

Clinell Chlorhexidine Shampoo Caps are also available.

#### Antibacterial barrier

Unlike conventional soaps and body washes, chlorhexidine binds to the skin to form an invisible antibacterial barrier.

#### Residual protection for up to 6 hours

Forming an invisible barrier, the Clinell Chlorhexidine Range provide long lasting protection against a range of microorganisms for up to 6 hours.

#### Use hot or cold

Use at room temperature or place in a Clinell Warmer for a warm wash cloth in seconds. For more information, see reverse.

#### Full body wash

Each pack delivers a full body cleanse, with wipes for each area to prevent microorganism transfer.

#### Provides rapid bactericidal action

Using the Clinell Chlorhexidine Range helps to reduce the number of bacteria on the body, offering protection against a wide variety of microorganisms that cause infection.

#### Suitable for multiple uses

Ideal for patient skin cleansing for pre-admission, outbreak management, pre-operatively to reduce the risk of surgical site infections, or for selective or universal decolonisation.

### Clinell Warmer

The cloths can be warmed in a Clinell warmer or in a microwave for 15 seconds at 750W to provide a more comfortable bathing experience.

The Clinell Warmer is suitable for: CBB8, CBBGL8, PRSHMC1, CHGWC8, CHGWGL8 and CHGSC1.

# Ordering information

	Product	Unit of issue	Product code	NHSSC code
 <p>Contains 2% chlorhexidine digluconate which kills harmful bacteria usually found on skin.</p>	Chlorhexidine Wash Cloths	Box of 12 packs (each containing 8 wipes)	CHGWC8	-
	Chlorhexidine Wash Gloves	Pack of 8	CHGWGL8	VJT664
	Chlorhexidine Shampoo Cap	Single unit	CHGSC1	VJT266

When using the Clinell Chlorhexidine Range, make sure to wipe all areas of the body thoroughly to ensure maximum protection. Discard cloths after use. Do not use on mucosal membranes. Let skin air dry. Skin will feel sticky for a short while as the chlorhexidine binds to it. There is no need to wash skin again for up to 6 hours after using the wipes.

Use biocides safely. Always read the label and product information before use.
