

Infection prevention
education with **GAMA**

Brought to you by

Clinical education in your hands

iQ is a professional training hub brought to you by one of Australia's market-leading infection prevention specialists, GAMA Healthcare. Designed to educate healthcare professionals about various areas of infection prevention and control (IPC).

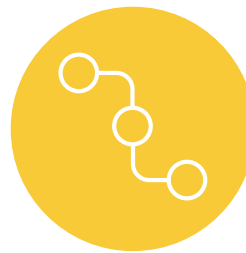

Our new training hub features bespoke learning pathways and training videos, which upon completion, users receive a certificate.

iQ has been developed to provide you with the following:

An introduction to IPC

Learn the essentials in infection prevention and control

Bespoke learning pathways

Measurable objectives to track your progress

Practical product demonstrations

See how products work and why they're important

Delivered by clinical experts

Decades of experience working in practice

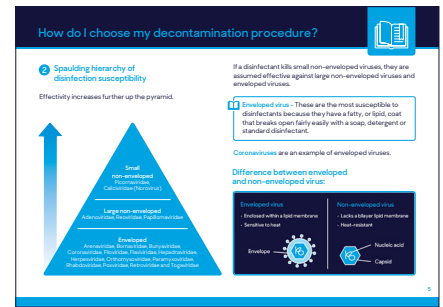

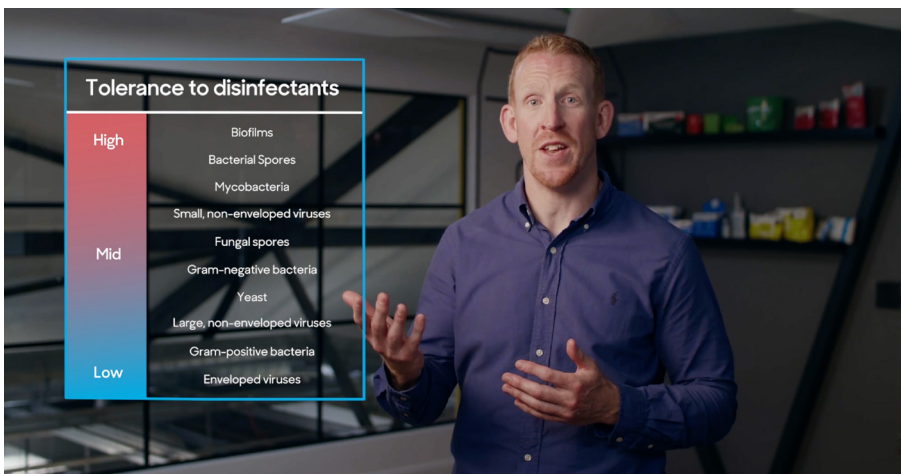

The screenshot shows the iQ training hub interface. At the top, there is a navigation bar with the GAMA iQ logo and links for Home, Dashboard, My sessions, All sessions, Meet the experts, Glossary, and User guide. Below the navigation bar, there is a sidebar menu with a 'Session' tab selected, showing a list of modules: Module 1: What is decontamination, Module 2: How do I choose, Module 3: Why is decontamination important, Module 4: How is decontamination performed, and Module 5: Is decontamination enough. The main content area is titled 'Session 02: Decontamination, cleaning and disinfection'. It features a large banner image of hands being washed in blue gloves with the text 'Decontamination, cleaning and disinfection' and an icon of an open book. Below the banner, there is a 'Session descriptor' section with a brief description of the session's focus. This is followed by a 'This session is delivered by:' section featuring five circular profile pictures of the experts: Dr. Phil Norville (Clinical and Scientific Director), Yvonne Carter (Clinical Director), Karen Wares (Clinical Director), Martin Kiernan (Clinical Director), and Michael Godwin Sanni (Clinical Specialist). A 'Meet the experts' button is located below the profiles. At the bottom of the main content area, there is a 'Learning outcomes and objectives' section.

Valuable and varied subject matter

iQ offers a plethora of training sessions to educate healthcare professionals on practising good IPC methods to help save and improve lives. There are multiple sessions to choose from, including the following:

- An introduction to infection prevention and control
- Decontamination, cleaning and disinfection

As a live service, new learning pathways will be continuously added to the iQ platform covering different areas within IPC. Each session features **educational videos, quizzes, workbooks** and **additional reading materials**.

Real-world development

Whether you're a junior nurse looking to have a greater understanding of IPC or a Senior looking to upskill your team, iQ is here to help improve IPC knowledge and encourage good practice.

After enrolling yourself into specific sessions, you can learn at your own pace, in any order you fancy, with access to module sections anytime you need to refresh yourself.

For more information about iQ and how to implement it into your training programme, please contact your local GAMA Healthcare Sales Representative or GAMA Healthcare directly at gama-iq-au@gamahealthcare.com
