SURFACE

# Enhanced Pods

A superior alternative to chlorine.

# New to Clinell

## The only solution to be fully sporicidal under latest TGA requirements.<sup>1</sup>

Clinell Enhanced Pods are a chlorine-free hospital grade disinfectant for cleaning and disinfection of floors and surfaces. Powered by Advanced Peracetic Acid (APA™), they are fast-acting and effective in soiled conditions.

### Suitable for:

- Hard and soft surfaces
- Bed spaces and hallways
- Washrooms and bathrooms
- Ceramic fittings (sinks and shower units)

- ✓ 2-in-1 cleaning and disinfection
- ✓ Effective from 30 seconds
- ✓ Fully sporicidal activity (EN 17126)
- ✓ No pre-cleaning or PPE required
- ✓ Fresh linen scent

## One-strength-fits-all products, such as chlorine, can't offer both value and efficacy.

In healthcare, different areas and situations call for different risk mitigation levels. Enhanced Pods offer two levels of protection, so you can step up to increase or speed up disinfection when appropriate for your organisation.

### Standard 1 pod per litre

Suitable for daily and terminal cleaning

### Step up 2 pods per litre

Suitable for daily and terminal cleaning in the presence of:

- Persistent outbreaks where standard decontamination is no longer suitable
- Speeding up disinfection of hard-to-kill organisms including *C. diff*, *Bacillus subtilis* and *Clostridium sporogenes* spores

# Enhanced Pods

## Superior alternative to chlorine.

### Safe and pleasant user experience

- Unlike chlorine-based disinfectants, Enhanced Pods are extremely safe and do not generate any toxic fumes when activated with water
- Scented with fresh linen, Enhanced Pods are more pleasant to use and neutralise odours

### Powered by APA™ technology

- Smartly formulated to generate a blend of actives including peracetic acid, APA™ cleans and disinfects in dirty conditions
- Non-damaging and breaks down to non-harmful by-products including water and oxygen

### Efficacy against *C.diff* spores in dirty conditions

- Unlike chlorine-releasing agents (CRAs), which are ineffective and rapidly inactivated by organic matter,<sup>2</sup> Enhanced Pods maintain their powerful efficacy even in real-world dirty conditions, as proven by the EN 17126 standard.

Organism	Time	Test
<b>1 pod per litre</b>		
<i>Clostridioides difficile</i>	5 minutes	EN 17126
Poliovirus	1 minute	EN 14476
Vaccinia virus	10 seconds	EN 14476
Norovirus	30 seconds	EN 14476
<i>Candida albicans</i>	30 seconds	EN 13624
<i>Pseudomonas aeruginosa</i>	30 seconds	EN 13727
<i>Staphylococcus aureus</i>	30 seconds	EN 13727
<i>Enterococcus hirae</i>	30 seconds	EN 13727
<i>Escherichia coli</i>	30 seconds	EN 13727
<b>2 pods per litre</b>		
<i>Bacillus subtilis</i>	5 minutes	ASTM E2197
<i>Clostridium sporogenes</i>	5 minutes	ASTM E2197
<i>Clostridioides difficile</i>	2 minutes	EN 17126

## Powering the Clinell Enhanced range.

Enhanced Pods are part of the Clinell family of surface solutions powered by APA™, including Clinell Sporicidal Wipes and Clinell Drain Disinfectant. Together, they offer an unbeatable holistic approach eradicating high-risk and hard-to-kill microorganisms from the environment.

### Non-invasive medical devices

Clinell Sporicidal Wipes

### Floors and large surfaces

Clinell Enhanced Pods

### Sinks and shower drains

Clinell Drain Disinfectant

Product	Unit of issue	Product code
Clinell Enhanced Pods 100 Tub	Tub of 100	CSEP100AUS
Clinell Enhanced 1 Litre Flask	1 Litre Flask	CSEP1L
Clinell Enhanced 5 Litre Flask	5 Litre Flask	CSEP5L
