

Hand Sanitising Gel Range

Fast-acting, easy-dry gel instantly sanitises hands without need for soap and water. Skin-friendly, moisturising formula leaves hands clean with no stickiness.

Clinell Hand Sanitising Gel Range

Skin-friendly formula moisturises and protects

Instantly disinfects hands without the need for soap and water. Containing a unique blend of 74% v/v alcohol and moisturiser providing a superior level of effectiveness against germs without drying hands out.

Unique formula

Specifically designed for use within the healthcare sector to kill germs and instantly sanitise hands.

Travel-sized

The 50ml belt clip bottle, with retractable lead, is small and convenient to carry with you at all times - at home, in the office, or on-the-go.

Ideal to use before eating

Safe to eat food with hands after application once the hands have dried naturally.

Dermatologically tested

Contains aloe vera to moisturise and promote healthy, soft skin.

Superior effectiveness

A blend of 74% v/v alcohol and moisturiser which provides a superior level of effectiveness against germs while not drying hands out.

Instant results

Ideal for hospitals and healthcare settings.

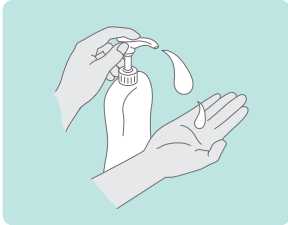

Improving hand hygiene

Clinell Hand Sanitising Gel contains a unique blend of 74% v/v alcohol (WHO recommended¹) and moisturiser.

Providing a superior level of effectiveness against germs, it instantly disinfects hands without the need for soap and water, without leaving a sticky residue. The formulation contains glycerin and aloe vera which helps to moisturise the skin, preventing dry, cracked hands often associated with other alcohol gels, leaving your hands feeling naturally refreshed.

How to clean hands effectively²

1. Apply a palmful of the product in a cupped hand, covering all surfaces

2. Rub hands palm to palm

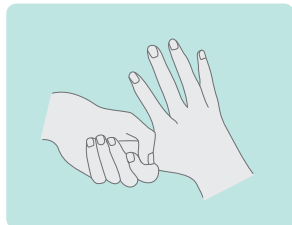

3. Rub back of each hand with the palm of other hand with fingers interlaced

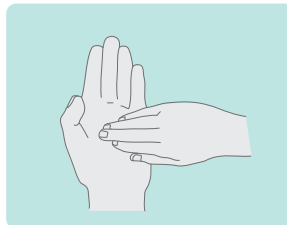

4. Rub with backs of fingers to opposing palms with fingers interlocked

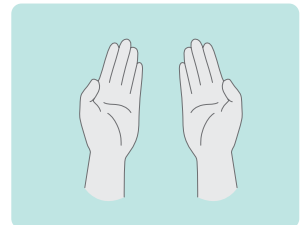

5. Rub palm to palm with fingers interlaced

6. Rub each thumb with the other hand, in a circle

7. Rub tips of fingers in opposite palm in a circular motion

8. Leave to air dry
