

'High Touch' surfaces in ward rooms

Contaminated surfaces & equipment contribute to the transmission of germs which could increase the likelihood of spreading infection. Effective routine cleaning of surfaces and equipment is an essential activity that protects, staff and visitors from infection.

The 5 principles of cleaning

- 1 Wipe in an 'S' shaped pattern
- 2 Work from top to bottom
- 3 Wipe from clean to dirty
- 4 Leave to air dry
- 5 One wipe, one surface

CLINELL UNIVERSAL WIPES - EFFECTIVE AGAINST COVID-19 IN 30 SECONDS
